Arkansas Citizens First Congress

Arkansas Renters United

JOIN US TO PROTECT ARKANSAS' FAMILIES FROM UNSAFE HOUSING

One-third of Arkansans rent. Some families are trapped in homes contaminated by mold. Some are stuck in homes with leaky roofs. Others are without working locks and windows. Some renters have unsafe common areas, such as stairways and landings. Some have homes infested with pests.

Arkansas is currently the only state where landlords aren't required to maintain safe and fit premises for tenants, or an "implied warranty of habitability." This is a public safety and health issue. It is also a deterrent to economic prosperity in the state.

Tell your lawmakers it is time for Arkansas to join the rest of the country in protecting families from unsafe living conditions by signing our petition below.
